

Max

DOB Unknown Gender: Male

Max joined our ohana in 2023. He gave us a scare when he ran off after we first brought him home, but thankfully he stayed close by. It took almost 2 months for us to lure him back. He has since learned to trust us and make Ohana his home. Today, Max is often the first to greet guests at the farm. Friendly and full of personality, he loves attention and has a special talent for making people smile. You might find him curled up on the therapy couch or quietly observing during counseling sessions, offering calm companionship in his own unique way.

Fun Fact!

Barn cats can make a world of difference when it comes to pest control. Rodents can wreak havoc and contaminate animal feed. Barn cats hunt and control the rodent population, giving you the peace of mind knowing the barn and feed is safe from contamination.
